

# SpellChecker

Dedicated spell checking solutions with CKSource support on special conditions

## SpellCheckAsYouType (SCAYT)

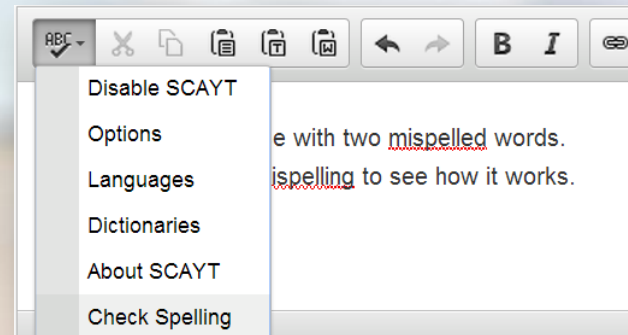

SCAYT allows the user to see and correct misspellings while typing. Misspelled words are underlined. The user just needs to right-click a marked word and select a suggestion to replace the word.

## WebSpellChecker (WSC)

WebSpellChecker operates in a separate browser window so your work is not obstructed. Corrected text is automatically returned to the form. Includes English language Grammar Checker and Thesaurus.

## SpellChecker features

### Custom and Users Dictionaries

- 16 basic languages, approximately 120 extended languages.
- Can be expanded with a custom dictionary that is specific to your business glossary or a user dictionary created individually.

### Customized User Interface

- User interface can be customized to meet your users' look and feel requirements in terms of: colors of buttons, captions, pages and text; fonts and font sizes; shape, size and location of page elements; company logos.

### Grammar Checker

- This case sensitive feature accesses a database of over 78 000 words tagged by different parts of speech. Intelligent suggestions are offered for grammatical errors. Grammar checking for French, German, Danish, Polish and more than 20 other languages is supported.

### English Thesaurus

- Over 77 000 English synonyms for over 35 000 key words are available to add an alternative punch to your text.

## Delivery versions

**Licensed version:** Installed on a client's server. Provides unlimited access to the spell checker engine, unlimited number of users, one year of maintenance, upgrades and support. Redistribution license possible.

**Hosted version:** Services are provided for an annual fee with usage limitations :

- SCAYT: 50 simultaneous users/connections (two or more users who use the Hosted version of SCAYT concurrently).
- WSC: 10 000 sessions per year. A session is from the time a user clicks "Spell Check" until he or she clicks "Finish Checking" or "Cancel". The checking of one word or one thousand words counts as a single session. Each additional session over 10 000 can be purchased at an additional fee.

## Technical requirements

- Browser Support: Internet Explorer 8.0 + (IE 6/7 – limited support); Firefox 20 +; Google Chrome 5.0+; Safari 4.0 +.
- Hardware: multicore/multiprocessor system with at least 1 GB of RAM.
- Platforms Supported: Microsoft Windows Server, Linux.
- CGI capable web server (IIS/Apache).
